

Fish Tail Seat

Model Number

FTS-24

After listening to our clients looking for another artistic seating experience, we asked the talented Nanaimo artist Jeff King to create a new sculptural masterpiece with the new fin-tastic Fish Tail Seat. This seat, made from 100 percent recycled sturdy cast aluminum, is a less costly alternative to the whale tail and will be a wonderful addition to a variety of sites and locations. The contoured fish tail seat is a comfortable height for all age groups and will provide hours of conversation and curiosity.

The whimsical tail will make a splash at waterparks, fishing holes, indoor and outdoor pools. It will also make a positive impact on our environment as three recycled aluminum vehicle rims went into the aluminum casting. Carp-e-diem!
