

Parker Aluminium Leaning Bench

Model Number

PLAL-5
PLAL-6

The Parker All-Aluminum Leaning Bench design is a result of requests from customers and I think we nailed it! Our design criteria were to achieve these goals: maximize the materials we currently have in stock (to keep our costs in line), complement our very popular Parker family series, and make it comfortable and stylish. The value of leaning benches is that they provide a perfect solution for those who don't want or need to sit but need a place to temporarily rest. Perfect for areas where there are plenty of commuters, this bench provides an alternative to standing in locations where benches are not feasible.

Material Specifications
