

# Pipeline Picnic Table

Model Number

PLPT-610 (2x10 Boards)  
PLPT-66 (2x6 Boards)

This tubular style picnic table is probably the most recognized design in municipal applications. And for good reason; they are very strong, functional, and represent a good value in these settings. The only challenge to the design is that most are made for wood and retrofitting for the lower maintenance recycled plastic lumber and aluminum frames has really not been done effectively.... until now!

As an innovator in this area, we have overcome this challenge and the Pipeline Picnic Table now effectively bridges that gap. It maintains that classic style, providing a uniform consistent look in the municipal setting while maximizing the strength and low maintenance virtues of aluminum and recycled plastic lumber.
