

Urban Space Picnic Table

Model Number

USPT-70

Ideal for high-traffic seating areas in parks, campuses, urban settings, the Urban Space Picnic Table is designed to encourage face-to-face interaction. This modern, all-aluminum design has several key benefits. Spacious seating and rounded corners make it both comfortable and accessible providing seating for up to as many as 8 people. The top surfaces are "perforated" with an attractive pattern to reduce the temperature of the metal in direct sunlight by decreasing surface area and increasing airflow. This feature also discourages graffiti. The pedestal and cantilevered seat design make it easily convertible to wheel chair accessibility by omitting one of the seat sections. There are intentional blank sections on the tabletop and seat sections that be used for customization purposes. During the manufacturing process we can C&C router logos or inscriptions for branding or dedication purposes. From a maintenance perspective the powder-coated aluminum is simple to upkeep and seat sections can be removed easily if needed.
